

22,500ltr Poly Self Draining Fert Tank with Poly Base

Australia
ENVIROFORM
POLY AGRICULTURAL SOLUTIONS

SKU:
FTPB-22500

DIMENSIONS:
3.45m Dia. 3.05m Overall Height

FEATURES:

- ✓ High Quality Polyethylene; The poly tank is manufactured from a prime virgin material that is food grade and UV Protected ensuring its potential to not only outlast in the harsh Aussie Environment but provide a clean vessel for your fertiliser asset. The polyethylene is also formulated to be highly durable, impact resistant and chemical resistant.
- ✓ Heavy Build; built to handle the heavier 1.5SG liquids, but can also be customised for liquids up to 2SG
- ✓ Quality Poly Base: the poly base is manufactured from the same materials as the tank; making it light weight and easy to install. The unit also works for rear tank pick up trailers.
- ✓ Certified design and analysis on structure; proven and being used by many large fert manufacturers and distributors
